Dear Dev :

Please forgive the delay in my writing to thank you for all of your support to the Aerospace Computer Systems Course, but my hectic schedule did not allow me to do so earlier.

I am particularly grateful for the presentation on independent validation and verification you gave on the afternoon of March 4th. Your dynamic presentation generated enormous interest and discussion among the students, and was a perfect complement to an earlier tour of the Oerlikon Aerospace plant. The subject matter and level of the presentation could not have been better targeted; in short, it had a tremendous influence on the students and greatly motivated them to study the theory, practice and potential of the software engineering field.

The course finished last Friday, and I believe that it was a great success. I thank you again for your efforts, both in and out of the classroom, which have been a major factor in the course's success.

Major Stephen Sibbald
Director
Aerospace Computer Systems Course
